Contributions are requested from all undergraduates, alumni, and officers of instruction. No anonymous manuscript can be accepted.

Subscription, \$2.00 per year, in advance. Single copies, 10 cts. each.

Entered in Post Office, Boston, Mass., as Second-Class Matter.

Press of Lounsbury Nichols & Worth Company.

HE approaching election of the 1903 *Technique* Electoral Committee demands the serious attention of every loyal Sophomore. Following custom, this committee is to consist of twenty-five members, who, in turn, elect the Board of Editors of *Technique*. Every '03 man is now well acquainted with *Technique*, its size and the nature and scope of its contents. He knows that each Junior Class, in its turn, has undertaken this task and improved on the publication of the preceding class. And with this knowledge must come the realization of the

work open for '03 to perform and the necessity for a Board of Editors capable of accomplishing this work successfully and to the honor of the class. Positions on the *Technique* Board are not sought after simply for the pleasure of holding office. Neither clique nor faction interests should enter into this election. The task required of the Board of Editors calls for unremitting and intelligent activity, and no man unfit for the position can desire, or has a right to, an election. This subject should be of prime importance to every Sophomore, and all who are eligible to vote should participate in the election of next week and use their suffrage understandingly and wisely.

ALTHOUGH The Faculty has not yet rendered its decision on the report of the Advisory Council, there is little doubt that all signs point to a revolution and revival in Tech athletics. It is now well known that the plan proposed by the Advisory Council sanctions football, but recommends that baseball be dropped. It is unnecessary to rehearse the reasons which led to this decision. The secondary position which Tech holds in the world of athletics has long been deplored. The Advisory Council seeks to alter this condition, and the remedy which it offers appears to be not simply the only, but the best one. The energy and funds of the athletic association and the classes should be turned full head into the channel of track athletics. The Advisory Council is comprised of men of impartial judgment, well competent to main-

tain the position which they hold. Their action was prompted by motives for the best interests of Tech, and that such is the fact must be admitted by all candid men. Although their action may oppose the interests of some, all the men should stand united in this attempt to raise the standard of athletics at Tech.

AS Engineering exhibits are to be one of the principal features of the Pan-American Exhibition many Technology graduates and undergraduates will undoubtedly go to Buffalo next summer. All these would surely enjoy their visit more, if among the sea of strange faces, they should meet the perhaps changed but still recognizable features of some former classmates, or the familiar countenance of an instructor or fellow-student. This being the case it would be an excellent policy for the Alumni Association to designate some week as "Technology Week at the Exhibition," and to notify the graduates, undergraduates, and all past students of the Institute of its date, so that all who can will endeavor to be at Buffalo at that time. If every man wore some distinctive Tech emblem, a red and gray rosette or some other mark as easily recognizable, Technology spirit and fellowship would be greatly increased, and the Institute much benefited. A banquet might also be held at one of Buffalo's representative hotels, at which all men connected with Technology could attend. Whatever the form of entertainment may be, we hope that something of this nature will be done, and sufficient Technology enthusiasm and display brought forward at some particular time to make it prominent even among the many other demonstrations which will be in evidence at Buffalo at that time.

HEATRICALS at the Institute had its origin several years ago in a play given by *l' Avenir*. Following in the footsteps set by their successful contemporaries, plays were given shortly after this by the Walker Club and by the German Society, *Die Gesellschaft*. All of these societies desired to give their performances during Junior Week, but as this was of necessity detrimental to financial success, it happened that in time the German play was given up and an agreement was entered into between the Walker Club and *l' Avenir* to give their performances in alternate years. The French society had, however, been for some time losing its clientele among the students, and thus it came about that for the last three years the Walker Club alone has given the Junior Week play.

Meanwhile the Tech Show had sprung up, and with the Hollis Street Theatre as a setting, and with public appreciation and support, this has come now to take a recognized and foremost place among the college theatrical enterprises of New England.

This is, in brief, the history up to date of Technology enterprise in histrionic lines. The present year sees us with three plays all in progress of preparation, each one well deserving of success and support, and with the dates of performances happily so arranged that there is at least a week between each of the productions. That three such affairs can all meet with success in one season, as the present outlook would seem to indicate, leads to one important conclusion, that there is something to be obtained out of a Technology education apart from the rudimentary principles of a scientific training.

It has often in the past been stated that the Tech student has but little college spirit. However true such a statement might have been a few years ago, it is evident that a

change has been taking place of late, so that the typical Tech man can no longer be classed with the proverbial grind, but is known to have some interest in matters apart from his regular college duties. This change, so evident on all sides, can only be regarded as much for the better, with the result that the Tech graduate of the future will be known as a man not only able to cope with the scientific principles in which he has received his training, but also, through his participation in college pastimes, will have attained a knowledge of men and affairs in general which will enable him much better to take his place in the battle of life and deal with the men with whom he will come in contact in the course of his future professional career. To rehearse for a play may take considerable of a man's time, and may cause him to give less time than he otherwise would to the preparation of his lessons, but the added experience thereby gained and the benefit received from meeting his fellow-students in a new light, will in the end more than compensate for the few hours less devoted to study.

 HE account of Dr. Pritchett's western trip will surely be found interesting to the readers of THE TECH. The trip has placed him in closer relations with Institute graduates and in doing this is sure to react advantageously upon our Institute life. One of the most pleasant features is the progress made towards the realization of the full Walker Memorial Fund. The Northwestern Alumni has proved its virility and interest in Technology by its large subscription to the Fund, and as the encouragement received everywhere was enthusiastic and sincere, the trip has surely added to the Institute's prestige and is, therefore, most satisfactory.

Look out for Junior Week "Tech;" it's going to be a corker.

President Pritchett's Western Trip.

President Pritchett of the Institute of Technology, has just returned from a trip in the west where he went to meet gatherings of Institute men and to fulfill certain lecture engagements. His first stopping point was at Cleveland, Ohio, where an association of thirty graduates gave him a warm welcome. The gathering was held on the evening of the 7th at the University Club, and in addition to the graduates and former students, President Thwing of the Western Reserve and President Staley of the Case School of Applied Science, were present; each of these gentlemen gave Dr. Pritchett a cordial welcome to Cleveland. A pleasant feature of this gathering was the fact, prominently brought forward, that the relations between the Institute of Technology and these western institutions was, and should be mutually helpful; that common interests were bringing together all institutions of serious purpose into closer relationship. In addition to visiting prominent manufacturing interests in Cleveland, President Pritchett addressed the two high schools of the city, and the University school. One purpose of President Pritchett's visit to Cleveland, was to examine carefully the new building of the Case School of Applied Science, erected especially for the teaching of electrical engineering. The Institute of Technology is working its buildings to their fullest capacity, and it must have, in the near future, a new and modern laboratory for the study of electricity and physics. President Pritchett is hoping that some citizen of Boston who feels interested in seeing the Institute maintain its position as a national institution will come forward and supply this want.

His next stop was at St. Louis, where he delivered, on Saturday evening, March 9, an address before the Round Table Club, a body of business and professional men of prominence, in that city. While there he had the opportunity to examine the new and magnificent buildings being erected for the Washington University, the institution with which he was for so many years connected. These buildings are being erected on a site adjoining one of the large city parks, where opportunities for growth for the next century are present. These buildings are being erected under conditions which allow considerations of dignity and fitness to have full weight; when completed they will form one of the most dignified

groups of University buildings in America. Washington University has received from citizens of St. Louis, within the last six years, about six millions of dollars, one gift of nearly three millions being from two men.

At Kansas City President Pritchett spoke before the Commercial Club on the evening of March 12. This club is an organization composed of business men of Kansas City, who meet monthly for the discussion of matters pertinent to the development of Kansas City. The body listened with very great interest to his talk on the "Possibilities of Commercial Education." On Wednesday, the 13th, Dr. Pritchett addressed the Manual Training School in the forenoon, and the High School in the afternoon. In the evening he attended a most pleasant gathering of Technology men and business men at the Kansas City Club. At this meeting the interests and prosperity of the Institute were most heartily discussed.

His next stop was with the University of Kansas at Lawrence, where he lectured before the Faculty and students on the subject of Governmental Administration. This western institution has shown a remarkable growth in the last five years, and has now an attendance of eleven hundred students.

President Pritchett's last stop was at Chicago, where, in addition to making one or two talks before preparatory schools in that city, he attended on the evening of the 16th a most enthusiastic meeting of graduates and former students of the Institute. The Northwestern Association of Alumni of the Institute is the largest organization outside of the home association. It holds monthly meetings throughout the year, and these are the most largely attended of any college gatherings in Chicago; and their annual meetings bring together more men than even those of Harvard or Yale. At this meeting last Saturday evening, beside President Pritchett, Secretary Gage was a guest, as was also President Gunsaulus of the Armour Institute. President Harper of the Chicago University was expected, but was unavoidably detained. President Pritchett speaks of his meeting with the Northwestern Association as one of the pleasantest episodes of his connection with the Institute of Technology. Not only did they welcome him most cordially, but after his presentation of the plans for the Walker Memorial Building, \$3,600 was

subscribed at once, after the meeting, as a start in showing what the Association could do, and a movement was begun pledging each member to a modest subscription looking to the rapid completion of the enterprise.

About \$60,000 has already been subscribed, and with the encouragement received during this trip, President Pritchett feels that there is no question but that the needed balance can all be cleared up before the Commencement Day.

These meetings with graduates and former students now engaged in engineering work has been in every way calculated to impress him with the value of the training given at the Institute, and he was able to obtain from these men valuable suggestions as to changes for the future.

Progress of the Tech Show.

Rehearsals for the "Grand Duke" continue successfully from day to day, and on all sides are being heard words of appreciation and encouragement for this, Tech's third annual college matinee. All the qualifications which aroused so much enthusiasm on the presentation of its predecessors are present in full measure in this opera, and it is sure to win instant success and gain innumerable friends for itself on this, its American *premiere*.

It is hoped that by next week it will be possible to announce the principles in the cast. The few who have thus far been definitely chosen include Lewis Emery as *Julia*, the leading lady, Matthew C. Brush as *Ernest*, the theatrical manager who finds himself under the necessity of marrying three times in one day, and Mortimer B. Foster as *Elsa*, a blushing and *petite* soubrette. Allan Winter Rowe will appear resplendent as the *Prince of Monte Carlo*, and James Driscoll, last year's deposed *Chief of the Wallahoos* will pour forth his woes in the character of a black-browed baroness.

One of the most clever complications that develops in the course of the opera is the "Statutory Duel," a bloodless encounter, though dire in its effects as the loser is hence-

forth dead to the world. A delightful duo in the second act, played by Matthew Brush and Lewis Emery, takes place between the defunct loser in one of these statutory encounters and his quondam sweetheart, who declines to coquette with the ghost of her former lover.

Mr. John Coleman promises many novelties and pleasing surprises in the ballet, one of the most prominent of these being the Dutch sabot-dance of ten peasants, dressed in the national colors of orange and yellow.

The French Play.

At a meeting of *L' Avenir* held last Friday evening it was definitely decided to produce *Les Romanesques* par Edmond Rostand, the author of "Cyrano de Bergerac," during the second week in May. *Les Romanesques*, acknowledged by everyone to be one of Rostand's masterpieces, is a most delightful comedy written in verse. The author in a note speaks of the action taking place "at any time and at any place, providing the costumes are elegant," thus giving the costumer and scenic artist excellent opportunities for beautiful stage effects in harmony with the musical rhythm and rhyme of the lines. *Les Romanesques* has never been produced in America, in fact this is the first time that amateurs have attempted to put a play in French verse upon the stage. The cast is not very large, there being only ten principals, but although there will be no ballet about thirty men are needed to take part in the production. The proceeds of the performance are to be donated to the Walker Memorial Gymnasium Fund.

Dinner of the Class of '96.

Nearly one hundred members of the Class of 1896 were present at their ninth annual dinner at the Hotel Brunswick on Saturday evening, March 23d. President Pritchett attended as a special guest of the class, and the menus were tastefully arranged in his

honor, containing a half-tone photograph of the president on the front page. Edward S. Mansfield acted as toastmaster. Speeches were made by President Pritchett, Eugene C. Haltman, Walter M. Stearns, and J. Arnold Rockwell, and the dinner closed with remarks on "The Twentieth Century," and "Reminiscences" by various members of the class.

Communications.

The Editors do not hold themselves responsible for opinions expressed by Correspondents.

March 24, 1901.

Editor of THE TECH, Boston, Mass.

My dear Sir:—Recently there came to my attention a certain statute governing the location of licensed liquor dispensaries in the city of Boston. This statute provides that no such place shall be maintained within a distance over a hundred odd feet of any educational institution devoted in any degree to the instruction of infants unendowed with powers of spirituous discrimination or mature discretion. In view of the fact that the Institute contains a large representation of this brood in its humilatingly large Freshman Class, I would suggest that prompt action be taken by the M. I. T. Y. M. C. A. J. C. O. K. I. O. U. Society in making an initial movement in the abolishing of the pernicious and wholly reprehensible institution known as the Brunswick Exchange and Institute Chapel. The total extinction of this abomination will add impetus to the sale of tonics by the Metcalf Druggist Company and give a stimulation to student indulgence in the Vichy (though vicious) waters of the Oak Grove. Possibly, too, as a consequence of the annihilation of the insidious temptation of chapel, the beneficent Riddler may be impelled to open up a soda and soft drink department in his emporium; while, at all events, the Faculty of the Institute will find itself compelled, *nolens volens*, to distribute free doses of molasses and water in the Armory on days of drill.

Uncontrollable modesty— together with my prominent connection with other reform movements of this city—compels me to request the suppression of my name from the publicity of your columns. Believe me, yours for the destruction of alcohol and nicotine in the cradle,

"HANNAH."

Buffalo Exposition Notes.

Plans for the opening day of the Pan-American Exposition, May 1st, are now well advanced. The exercises inaugurating this splendid international festival of occidental nations will befit the importance of the event. At 2 o'clock in the afternoon, in the beautiful Temple of Music, it is proposed to start the machinery of the Exposition. The special train carrying the President of the United States and his Cabinet from Washington to the Pacific Coast will be connected by telegraph with electrical apparatus in the Music Temple, and this apparatus will be connected with the great electric generator in the Electricity building. Direct telegraphic communication will be made at the same moment between the executive offices of the Presidents of all the republics of the hemisphere, and the Governor-General of Canada, and this electrical apparatus in the Music Temple. At 2 o'clock, Buffalo time, by arrangement with the cable companies leading to South America, and with the telegraphic companies, and with the Atlantic cable companies the presidents and rulers of all the countries of the Western Hemisphere will be requested to touch an electric button in their office which will thus start a piece of machinery of the exposition, and they will at the same time transmit a message of greeting at the opening to be read in the Music Temple.

President McKinley from a special telegraphic apparatus in his car on the special train, surrounded by his Cabinet, will then start the great fountain pumps and will transmit over the wires a message of greeting to the people assembled on the occasion of the opening.

The dedicatory ceremonies of the Exposition which will be very imposing, will take place about the middle of May, possibly on the 14th, when it is expected that Vice-President Roosevelt, Governor Odell, and a large body of national and diplomatic officials, together with those of the Army and Navy, will be present and participate.

President's Day will be between June 9th and 12th. The date will be fixed definitely within a few days. President McKinley and his Cabinet will come to the Exposition from Duluth.

The committee having in charge the arrangements for these special exercises, intend to make them more elaborate and inspiring than any similar ones connected with an Exposition.

The electrical department of the Exposition is rushing its work. The force has been largely increased. Wire connections are being made on the great tower. Lighting tests of the two large restaurant buildings on the Plaza will be made next week. The machinery for the Electric Fountain in the North Bay of the Park Lake, which is to be one of the dazzling features of the Exposition, is being installed. Machinery to be used in the electric lighting and service plant has arrived and is being put in position.

The Exposition police force is being drilled every day. It will be brought to the highest efficiency possible. Governor Odell has signed the bill authorizing the City of Buffalo to issue \$150,000 in bonds to secure funds to defray the expenses of police protection of the grounds.

The coloring of the Exposition Building is progressing favorably. An extra force of painter-decorators will be employed to aid in pushing the work to completion.

Where is a list of M. I. T. clubs and club members to be found? In *Technique*, 1902.

What are THE TECH's foremost competitors? *Technique* and *The Catalogue*.

Naval Agricultural Society Dinner.

The regular monthly meeting of the Naval Architectural Society was held at Marliave's, Wednesday evening, March 20. About thirty members, including most of those newly elected from the Junior class were present. After the dinner, the retiring president, Mr. Horne, stated briefly the past history and future prospects of the Society, and introduced his successor, Mr. Eastwood. The latter in responding expressed his hope for the co-operation of all the members in making the Society one of the leaders at the Institute.

Mr. Ayers then gave a highly interesting account of some experiences as locomotive fireman. Mr. Church read a paper on the Steam Turbine, giving in admirably condensed form, the history of the turbine, and

its difficulties and advantages when applied to vessel propulsion. Mr. Newell, the guest of the occasion, then spoke, giving the society best wishes for the future, and a few words of friendly advice. After a vote of thanks to the speakers, the Society adjourned, closing a very enjoyable meeting.

The Society of Arts.

The 551st regular meeting of the Society will be held at the Institute, Walker Building, on Thursday, March 28, 1901, at 8 P. M.

Prof. M. I. Pupin of Columbia University will address the Society on "Electrical Wave Transmission." Apparatus will be shown.

Members are requested to invite friends interested in the subject.

GEORGE V. WENDELL,
Secretary.

Musical Clubs.

The Musical Clubs give a concert at the West Newton Unitarian Church to-morrow, March 27th. The train leaves the Trinity Place Station for West Newton at 7.07 P. M. The following concert will be at the Century Club, Salem, April 5th, the train leaving the North Station at 6.40.

The Clubs will hold their Spring Concert April 24th, at Paul Revere Hall, Mechanics Building.

M. I. T. A. A.

The annual election of officers of the M. I. T. A. A. will be held Friday, at 1 P. M., in Room 11, Rogers. All members are requested to be on hand.

1904.

The Class of 1904 will hold their dinner at the Thorndyke, March 30th, 1901. Tickets may be obtained from Homer, Bull, McClung, Wakefield, Sperry and Henderson.

Who is the biggest grind at Tech? *Technique*, 1902, will tell you.

It seems Hunter gets hard knocks otherwise than through the Lounger.

President Pritchett will address the Civil Engineering Society at their dinner, April 10th.

F. P. McKibben, I, '94, instructor in Civil Engineering in the Institute, has been nominated for election to the Am. Soc. C. E.

The Mining Engineering Society will hold its annual dinner this evening at the United States Hotel. Louis S. Cates, '02, will act as toastmaster.

Professor M. I. Pupin, of Columbia University, will address the Course VI. men, Friday morning, from 9 to 10. The topic will probably be "The Application of Mathematics to Engineering."

On March 18th, the class in Dynamical Geology was treated to a lecture by Miss Elizabeth F. Fisher on "The History of a River." Miss Fisher is a graduate of the course in Geology at the Institute in the class of '96. At present she is instructor in geology at Wellesley College.

An accident occurred in the Engineering Laboratory in the Pierce Building last Monday. The clutch which throws the pump into connection with the engine, broke, and sent a couple of pieces of metal flying through the air barely missing a couple of those carrying on the test.

The studies of the fourth year architects for "An Architect's Club House" have been hung in the exhibition room in Pierce Building. The third year designs of "An Archi-

tect's Country Office" are also on exhibition and mention will soon be made on both series. In addition to these there is an extremely interesting collection of pencil and water color sketches loaned by Mr. Dwight Blaney for exhibition.

A meeting of the Alumni Walker Memorial Committee was held in President Pritchett's office last evening. It is understood that important developments of the committee's work were disclosed at the meeting, as well as the results of President Pritchett's western trip. A full account of the meeting will be given in our next issue.

A prize of five dollars will be given for the best design of a seal for the Civil Engineering Society, M. I. T. All designs must be not larger than 4 inch by 4 inch (to be reduced to about 1 inch by 1 inch), on heavy paper, with the contestant's name placed inside a thick, sealed envelope, which shall be attached to the design. Designs may be left at the Cage for R. S. Loring. Competition closes March 26, 4 P. M.

After a brilliant lecture delivered Saturday before the Alliance *Francaise, groupe de Boston et Cambridge*, at the Tuileries, the Architectural Department of the Institute of Technology was honored by a visit from the French ambassador. In company with Professor Despradelle, his Excellency M. Jules Cambon, Ambassador of France at Washington, visited this section *incognito*, as he desired at least a glimpse of a department, the product of which is so impregnated with the French spirit.

His Excellency was much interested, and was particularly impressed with the work of some of the students of the Fifth Year who are engaged in the Competition of the Society of Beaux Arts.

The Electrical Engineering Laboratories have received from the General Electric Company, a sixty cycle constant current

transformer with a complete outfit of series incandescent lamps in sockets of the street lighting type and also five of the latest style sixty cycle 6.6 ampere enclosed arc lights.

The transformer equipment has been further increased by a matched pair of 10 Kilowatt, 60 cycle transformers which have primary windings for either 1,000 or 2,000 volts, suitable for connection to the Mordey dynamo. The secondary is arranged for the regular three wire system. These instruments are nearly all set up and will be ready for use in a short time.

The third catalogue of the Class of '93, for the year 1900, has come to the office of THE TECH. It contains a short article on the Walker Memorial Gymnasium by C. M. Spofford, Assistant Secretary of the class. It was the original intention of the class to issue a class book annually; but since the appearance of the *Technology Review* such a book has become unnecessary. The Executive Committee has now decided to publish the Class Catalogue only when changes of address and other considerations make such publication necessary, probably at intervals of about two years.

The office of THE TECH has undergone a complete renovation and refurnishing and is now in much better condition for occupancy than formerly. The floor has been recovered with linoleum, and the shelves holding the files of THE TECH concealed by neat curtains. A large library table has been added and the old chairs replaced by neat office and desk chairs. This gives THE TECH an entirely newly-furnished office and makes its quarters the best of the student publication offices.

The members of THE TECH staff have been issued new shingles certifying membership on the board of editors. The shingle is an exceedingly neat creation of the Heintzmann Press, printed in black and red on gray

leather, in block type, with an old German border. The whole is a credit to the printer, and each shingle issued will be highly prized by the editor who has earned it.

The large advance orders for tickets for the Tech Show, which were sent in with great rapidity after the seat blanks were left for distribution at the Cage on last Saturday morning, gives assurance of the great interest which is being taken in the enterprise this year. "The Grand Duke" gives promise of being an even greater success than either of the previous Tech Shows, and applications for seats for either the dress rehearsal or the regular performance should be sent in at once.

The committee in charge of the Tech Show, "The Grand Duke," has issued a neat folder, announcing the production of the play in matinee at the Hollis Theatre on the afternoon of Friday, May 3d, at 2 o'clock.

The dress rehearsal will take place at the same theatre on the afternoon of Tuesday, April 30th, at 2 o'clock.

An early application for seats will be necessary to forestall disappointment, as the demand is already very large. Seat blanks may be obtained on application to any member of the committee, addressing them at the Mass. Institute of Technology. The members of the committee are Messrs. Rowe, Laws and Mixter.

The Freshmen Class will hold their first annual dinner Saturday, March 30, at the Hotel Thorndike. Tickets for the dinner can be obtained from the committee: Homer, Bull, McClung, Wakefield, Sperry and Henderson.

Undergraduate Subscriptions.

The undergraduate movement for subscriptions to the Walker Memorial Fund is progressing. The Junior Class subscription has increased to \$300. Lists of all members of

the class have been prepared. Work in the Sophomore Class has added \$40 to the previous subscription of \$180. A systematic canvass of the courses in the class is to be made. In all probability the movement will be commenced in the Freshman Class at its approaching dinner. The Seniors are yet to be heard from.

Boston University, 8. M. I. T., 15.

The Technology Basket Ball Team, last Monday evening finished the season with a victory, defeating Boston University at the Allen Gymnasium in a closely contested game by a score of 15 to 8. Every man on the Institute team played a fast, snappy game, and all deserve credit for the victory. Libbey, although injured early in the second half, pluckily continued to play, and by his fine work scored most of the points for Tech. The Freshman Band added to the enjoyment of the evening, playing both before the opening of the game and during the intermission. The line-up follows:

M. I. T.	B. U.
Libbey, r. f.	Tucker, l. f.
Hunter, r. g.	Merrit, l. g.
Fitz, c.	Burke, c.
Cox, l. g.	Carey, r. g.
Gundrum (Lee), l. f.	Rink, r. f.

Score—M. I. T. 15. B. U. 8. Goals from field—Rink 2, Burke, Gundrum, Fitz, Libbey 3. Goals from fouls—Libbey 3, Tucker 2. Referee—Carven, M. I. T. Umpire—Ayers, B. U. Time—20-minute halves.

Yacht Club.

At a meeting of the Yacht Club last week a committee was appointed to make arrangements for a banquet to be held during April. The following men were elected to membership:—G. M. Spear, '01; W. H. Farmer, '02; H. A. Ferrin, '02; H. S. May, '02; F. F. H. Smith, '02; R. R. Jordan, '03; F. T. Taylor, '03; G. W. Landrus, '04.

The Junior Week "Tech" will be issued Wednesday, April 24th. It will be a Special Number.

Hare and Hounds Run.

The Hare and Hounds Club held its last regular run from Wellesley Hills last Saturday. The twenty-two men out was the largest this year, and indeed, the largest since October, 1897.

The following men, having finished over three-quarters of the run for this year, are entitled to wear the club emblem T. H. H.:— J. R. Marvin, '02; F. H. Hunter, '02; A. P. Porter, '04; C. H. Drew, '04; H. H. Gould, '04; S. T. Worcester, '04; C. R. Haynes, '04; G. M. Proudfoot, '04, and A. M. Holcomb, '04. The winners of the Championship Run next Saturday will also be entitled to wear the emblem.

The Championship Run of the Hare and Hounds Club next Saturday promises to be the largest athletic event ever held in the Institute, as over twenty entries have already been received.

Basket Ball.

The Basket Ball team again suffered defeat in the second game with Harvard, by a score of 27 to 4. The game was Harvard's from the start and her superior team was too much for Tech. At the beginning of the second half Tech braced up, and up to the middle of the half held Cambridge well. Harvard, however, added nine points to her score in the second-half, while Tech failed to make a

single goal during the same period. Libbey and Cox played a good game for Tech, and Gillis and Clark were Harvard's star men.

Athletic Notes.

The Freshman Baseball Team had its first practice on Irvington Oval yesterday.

Captain Metcalf of the Freshman Baseball Team has issued a call for men, and asks all candidates to be at the Gymnasium every afternoon at four o'clock.

Manager Cook of the Foot Ball Team has arranged games with the following colleges for next season: Holy Cross, Amherst, Wesleyan, Tufts, New Hampshire State College, and Brown. He is now negotiating with Williams, Trinity and Dartmouth, and will announce his complete schedule in the near future.

Calendar.

Friday, March 29th.—Civil Eng. Society Meeting; 4.15 P. M., Eng. B. M. I. T. A. A. Annual Election, 1 P. M., Room 11, Rogers.

Saturday, March 30th.—Hare and Hounds Club Championship Run, Wellesley Hills; leave Trinity Place Station at 2.15 P. M. Freshman Class Dinner, Hotel Thorndike.

ROBERT F. HERRICK,

The Beacon Chambers building is now fully completed, furnished and occupied.

It is the only fireproof building in Boston, built and maintained exclusively for the use of students and young men who wish to live at a moderate cost.

It has every modern convenience and many attractions, the lower floor being devoted to the recreation of its patrons.

It offers cleanliness, first-class service and comfort. References required in all cases.

The building can be seen and full particulars obtained by applying at the office, or by addressing

NEW BILLIARD ROOM.

JOHN A. SHERLOCK.

Week Commencing April 1, 1901.

Hollis Street Theatre.— Mr. John Drew and Miss Ida Conquest have made a very decided success in "Richard Carvel." Mr. Drew plays in his usual brilliant manner and Miss Conquest has a charming way which wins the admiration of all. The supporting company is well chosen for the different parts. Next week is the last week.

Colonial Theatre.— "Ben Hur" is now in its fifteenth week of uninterrupted success. Its fame has spread all over New England and hundreds are coming to Boston to see it. The engagement will close on April 20, and seats may be secured for the balance of the time.

ALL THEATRES Square.

Telephone 608 and 950 Back Bay.

Tremont Theatre.— Sarah Cowell LeMoyne has made an artistic triumph in "The Greatest Thing in the World." The parts are taken by unusually capable players. Next week Miss Henrietta Crossman will present the merry play, "Mistress Nell." The play is based on episodes in the life of the famous Nell Gwyn. Miss Crossman has had a tremendous success in New York.

Boston Museum.— Louis Mann and Clara Lipman will continue to amuse large audiences with "All on Account of Eliza" for the rest of this week. Next week Herbert Kelcey and Effie Shannon will play in the romantic drama "Manon Lescaut."

Castle Square Theatre.— "Peg Woffington" with Lillian Lawrence in the title role will be given for the rest of this week. Next week the Castle Square Company will add a Shakespearean play to their repertoire. "The Merchant of Venice" with great accuracy shown in the scenic and costume effects is promised.

Boston Theatre.— Primrose and Dockstader Minstrels for the rest of this week. Next week, Grand Opera.

Park Theatre.— This week, "The Girl from Maxims." Next week, "Sapho."
